

Good Morning, I want to ask that the General Law Committee at their public hearing on March 8, 2011 look the real problems with current regulations and research the benefits of HB 6446 An ACT CONCERNING REGISTRATION REQUIREMENTS OF PUBLIC SERVICE TECHNICIANS AND CERTIFIED COMPETITIVE VIDEO SERVICE PROVIDERS.

HB 6446 is about what is fair in the work place. With the current regulations any of the many video service companies can have two workers working on the exact same equipment for an installation project. And the only differences between the workers being that one worker is an employee of the video service company and the other being a contracted worker brought in for the specific project. Under the current rules and regulations only one of these two workers has to maintain a public service technician license issued by the consumer protection department. That worker is the direct employee of the video service company, any contracted employee is not required to be licensed.

Please pass this legislation and make sure that we have the same rules for everyone.

Please vote in favor of HB 6446.

Thank you,

Deborah Rodriguez
